- 2. To begin this module, you should have:
  - 1. Basic Math and Stats skills
  - 2. Business and Domain Awareness
  - 3. General Computing Background

NOTE: These workbooks contain many resources to lead you through the course, and provide a rich set of references that you can use to learn much more about these topics. If the links do not resolve properly, type the link address in manually in your web browser. If the links have changed or been removed, simply enter the title of the link in a web search engine to find the new location or a corollary reference.

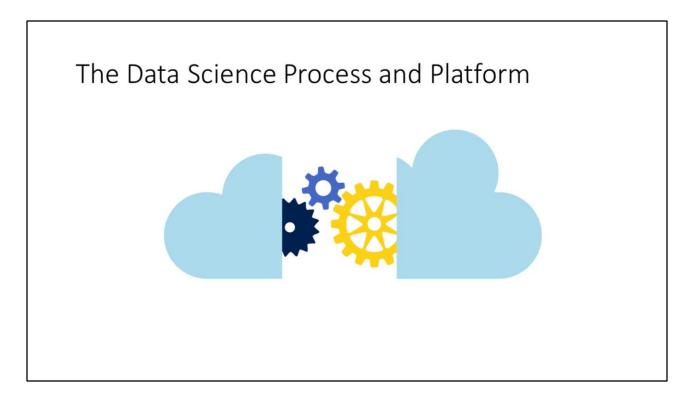

# Section 5 Learning Objectives

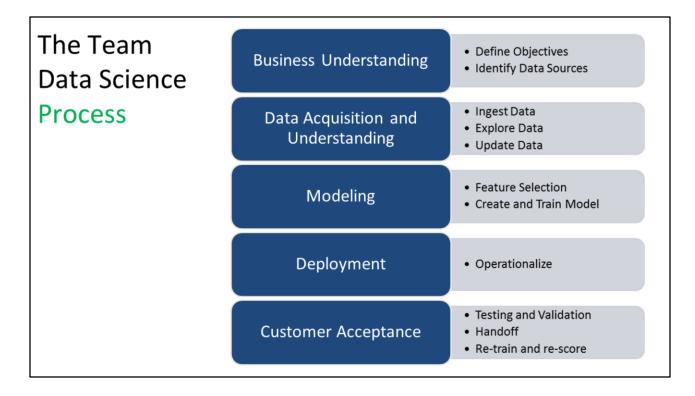

- Understand how to evaluate the efficacy and performance of an Azure ML experiment
- Understand how to evaluate the efficacy and performance of an MSR ML experiment
- Access and show data from Azure Storage
- 4. Access and Query Azure SQL DB

- 1. At the end of this Module, you will:
  - 1. Understand how to evaluate the efficacy and performance of an Azure ML experiment
  - 2. Understand how to evaluate the efficacy and performance of an MSR ML experiment
  - 3. Access and show data from Azure Storage
  - 4. Access and Query Azure SQL DB

- 1. This process largely follows the CRISP-DM model: <a href="http://www.sv-europe.com/crisp-dm-methodology/">http://www.sv-europe.com/crisp-dm-methodology/</a>
- 2. It also references the Cortana Intelligence process: <a href="https://azure.microsoft.com/en-us/documentation/articles/data-science-process-overview/">https://azure.microsoft.com/en-us/documentation/articles/data-science-process-overview/</a>
- 3. A complete process diagram is here:

  <a href="https://azure.microsoft.com/en-us/documentation/learning-paths/cortana-analytics-process/">https://azure.microsoft.com/en-us/documentation/learning-paths/cortana-analytics-process/</a>
- 4. Some walkthrough's of the various services: <a href="https://azure.microsoft.com/en-us/documentation/articles/data-science-process-walkthroughs/">https://azure.microsoft.com/en-us/documentation/articles/data-science-process-walkthroughs/</a>
- 5. An integrated process and toolset allows for a more closeto-intent deployment

6. Iterations are required to close in on the solution – but are harder tio management and monitor

### The Cortana Intelligence Platform

- 1. Platform and Storage: Microsoft Azure <a href="http://microsoftazure.com">http://microsoftazure.com</a> Storage: https://azure.microsoft.com/en-us/documentation/services/storage/ (Host It)

#### Apply a trained model to:

- A list of recommended items
- Forecasts for time series models
- Estimates of projected demand, volume, or other numeric quantity, for regression models
- Cluster assignments
- A predicted class or outcome, for classification models
- Probability scores associated with these outputs
